

Type sheet

Pressure and vacuum relief valve KITO® VD/o-25

Application

As end-of-line armature, as venting and breather device mainly for tanks in which non-flammable liquids are stored. Valve is used to prevent inadmissible pressure or vacuum as well as gas losses or inadmissible emissions respectively. Valve is not explosion-proof or endurance-burning proof.

Dimensions (mm) and settings (mbar)

For valves with bigger nominal sizes see type sheet E 17 N

Weight 6.5 kg (indicated weight is understood without weight load and refer to the standard design).

Standard valve setting 10-30 mbar pressure (maximal 70 mbar) and 3-50 mbar vacuum -different settings against additional price-

Design

	standard	optionally
housing / valve seat	steel / stainless steel mat. no. 1.4571 <i>(Design left half of the sectional image)</i>	stainless steel mat. no. 1.4571 <i>(Design right half of the sectional image)</i>
valve parts / valve spindle	stainless steel mat. no. 1.4571	
load weight	stainless steel mat. no. 1.4571	
valve sealing	NBR	Viton, PTFE, EPDM
valve pallet (vacuum)	spring loaded	
valve pallet (pressure)	weight loaded	
weather hood	stainless steel mat. no. 1.4301	stainless steel mat. no. 1.4571
flange connection	drilled to EN 1092-1 PN 40 type B1	drilled to ASME B16.5 Class 150 RF

Example for order

KITO® VD/o-25
(design with flange connection DN 25 PN 40)

Without EC certificate and CE-marking

Type sheet

Pressure and vacuum relief valve KITO® VD/o-25

Performance curves

Flow capacity \dot{V} based on air of a density $\rho = 1.29 \text{ kg/m}^3$ at $T = 273 \text{ K}$ and atmospheric pressure $p = 1.013 \text{ mbar}$. For other gases the flow can be approximately calculated by

$$\dot{V}_{40\%} = \dot{V}_b \cdot \sqrt{\frac{\rho_b}{1.29}} \quad \text{or} \quad \dot{V}_b = \dot{V}_{40\%} \cdot \sqrt{\frac{1.29}{\rho_b}}$$

The indicated flow rates will be reached by an accumulation of 40% above valve's setting (see DIN 4119).
If the allowable overpressure is less 40%, please consult der factory for the corrected volume flow.
